How to Read Crosstabs

Q1. All in all, do you think things are headed in the right direction or are things pretty much on the wrong track?

		Gender		
		Male	Female	
Total results →	Total	1371	722	Subgroup results ←
		100%	100%	
		(B)	(C)	
	Right direction	943	549B	Significance test ←
		69%	71%	
Responses →	Wrong track	236	100	
		17%	14%	
	Don't know	192	113	
		14%	15%	
		Indicates level of significance ←		
		(sig=.05) (all_pairs) columns tested BC		

How to Read Crosstables

In the example chart (left), rows represent the three possible response options to the question “All in all, do you think things are headed in the right direction, or are things pretty much on the wrong track?” The three response options are: “right direction,” “wrong track,” and “don’t know.” The amounts in each response category sum to the amount in the “total” row at the top of the table.

The first column, or banner, is the “Total” column. It reflects the overall results. The next two columns reflect the results of a subgroup, “Gender.” The gender subgroup is composed of Males and Females, each with their own column. Both gender groups are assigned a letter (Male=B, Female=C).

These two columns show how males’ attitudes compare to females’ attitudes. As shown in the chart, 69% of the full sample thinks things are headed in the right direction. Looking at the gender subgroup, 71% of women think things are headed in the right direction, compared to 66% of men.

Statistically Significant Differences

If a pair of cells has a difference which is statistically significant, the larger of the two cells is flagged with the letter of the opposite column. The test shows the difference in females’ attitudes about things being headed in the right direction is statistically significantly different than those of males’, which is signified by a “B” (the letter given to Males) next to females’ results for “right direction.” The footnote indicates the level of significance (sig=.05). This level of significance means that 5% of the time, the difference between how the two groups feel about the direction is due to random chance, while 95% of the time the difference is meaningful.

Statement of Limitations

Any sampling of opinions or attitudes is subject to a margin of error, which represents the difference between a sample of a given population and the total population. The margin of error is a statistic expressing the amount of random sampling error in a survey's results and differs by sample size, as reflected in the table below.

Margin of Error Based on Sample Size

N=1200	N=1000	N=800	N=600	N=500	N=400	N=300	N=200	N=150	N=100	N=50
+/- 2.8%	+/- 3.1%	+/- 3.5%	+/- 4.0%	+/- 4.4%	+/- 4.9%	+/- 5.7%	+/- 6.9%	+/- 8.0%	+/- 9.8%	+/- 13.8%

In recent years, the Washington State Legislature has explored new revenue options to help fund transportation projects as gas tax collections have not been enough to cover rising maintenance costs. One policy discussed by legislators is a retail delivery fee. Generally, a retail delivery fee is a fee imposed on the delivery of retail items delivered by motor vehicles in the state. At least two other states have implemented a retail delivery fee to help pay for road maintenance.

Q41. Would you support or oppose the implementation of a retail delivery fee in Washington?

In recent years, the Washington State Legislature has explored new revenue options to help fund transportation projects as gas tax collections have not been enough to cover rising maintenance costs. One policy discussed by legislators is a retail delivery fee. Generally, a retail delivery fee is a fee imposed on the delivery of retail items delivered by motor vehicles in the state. At least two other states have implemented a retail delivery fee to help pay for road maintenance.

Q41. Would you support or oppose the implementation of a retail delivery fee in Washington?

Washington's current plan of government limits regular sessions of the Legislature to 105 days in odd-numbered years and 60 days in even-numbered years. This means state lawmakers can only consider bills from January until either March or April.

Q42. Would you support or oppose an amendment to the state Constitution to allow the Legislature to be in session year-round?

Currently, local governments in Washington are limited to a 1% annual property tax increase unless voters approve a larger increase. Some lawmakers have proposed increasing the limit to 3%.

Q43. Would you support or oppose increasing the annual property tax cap in Washington from 1% to 3%?

Q59. Below are two statements about Washington's economy. Please select the statement that comes closer to your view.

1. Washington can have a strong economy based primarily on small, locally-owned businesses. We should focus on supporting these small businesses because they ensure dollars spent by Washingtonians stay in Washington.

Or

2. Washington cannot have a strong economy based primarily on small, locally-owned businesses. We should focus on attracting and supporting larger businesses that offer more jobs with higher pay.

Q59. Below are two statements about Washington's economy. Please select the statement that comes closer to your view.

1. Washington can have a strong economy based primarily on small, locally-owned businesses. We should focus on supporting these small businesses because they ensure dollars spent by Washingtonians stay in Washington.

Or

2. Washington cannot have a strong economy based primarily on small, locally-owned businesses. We should focus on attracting and supporting larger businesses that offer more jobs with higher pay.

Q66. Which of the following do you think is most likely to happen if the United States enacted policies to make it more difficult and costly for foreign countries to sell their products to Americans?

1. Foreign countries would agree to negotiate trade deals that are more favorable to the United States.

Or

2. Foreign countries would retaliate by enacting their own policies that would make it more difficult and costly for the United States to sell products abroad.

Q69. Which of the following statements most closely matches your view of Washington's public education system, even if neither matches your opinion exactly?

1. Our K-12 schools do not have a funding problem; if they spent what they have more efficiently they could meet the needs of all students.

Or

2. Our K-12 schools have a serious funding problem; there's simply not enough money to meet the needs of all students.

Q69. Which of the following statements most closely matches your view of Washington's public education system, even if neither matches your opinion exactly?

1. Our K-12 schools do not have a funding problem; if they spent what they have more efficiently they could meet the needs of all students.

Or

2. Our K-12 schools have a serious funding problem; there's simply not enough money to meet the needs of all students.
